Max Driving Torque: 10 Nm
Creepage Distance: > 10mm
Clearance in Air: > 10mm
Insulation Group: D

P = 28mm for D = 65mm
P = 35mm for D ≥ 75mm

Care should be taken to ensure that there still is electrical clearance of 15 mm between terminations and other live or earthed parts above the capacitor, in case of safety device activation.
